EDUCATION

Kalaingar Karunanidhi Institute of Technology

B.Tech – Artificial Intelligence & Data Science — CGPA: 7.69 / 10.0

Coimbatore, India

2023 – 2027

- **Coursework:** Data Structures & Algorithms, System Design, Operating Systems, DBMS, Computer Networks

TECHNICAL SKILLS

Languages: Python, JavaScript, TypeScript

Frontend: React.js, Next.js 14, Tailwind CSS, Zustand, TanStack Query, HTML5, CSS3

Backend: Node.js, Express.js, REST APIs, NextAuth, JWT, OAuth 2.0, bcrypt

Databases & Infrastructure: PostgreSQL, MongoDB, Redis / Upstash, Docker, GitHub Actions, Vercel

Testing & Payments: Vitest, Jest, Playwright, Stripe

PROJECTS

Fixly — Two-Sided Local Services Marketplace

Oct 2024 – Present | [GitHub](#)

Next.js 14 · TypeScript · MongoDB · Redis · NextAuth · Stripe · Vitest · Jest · Playwright

- Architected a full-stack serverless marketplace with **role-based access** (Hirer/Fixer) supporting a **6-stage job lifecycle** across 50+ service categories, backed by **102 RESTful API routes** and **150 handlers** following resource-oriented REST design principles.
- Built a **real-time messaging layer** with 29 typed event contracts, per-conversation capability-scoped token auth, presence and typing indicators, and an automated content filter silently blocking contact-info sharing before job assignment.
- Secured the platform with **Google OAuth 2.0**, **email OTP**, **phone auth**, **bcrypt**, and CSRF protection; implemented **Redis-backed sliding-window rate limiting** across 66 routes and idempotent **Stripe Checkout** with webhook signature verification and payment-event deduplication.
- Applied **MongoDB indexing** on high-frequency query fields to reduce read latency; offloaded async work to **12 serverless background jobs** (signup workflows, inactive-job auto-close, orphan-upload cleanup) and enforced quality with **353 test files / 1325 test cases** spanning unit, integration, and E2E flows.

SnakrX — Authenticated Multiplayer Game Platform

Oct 2025 | [GitHub](#) | [Live](#)

React 18 · Firebase Auth/Firestore/Cloud Functions · Vite · Tailwind CSS · Vitest · Playwright

- Shipped a production game platform with 4 modes including VS-Bot (**A* pathfinding** + deterministic impossible-mode AI), local multiplayer up to 4 players, weekly leaderboard aggregation, 74 achievements, and a full friend system.
- Moved all trusted mutations server-side via **18 Cloud Functions** (Node 20) — game finalization, OTP-verified signup, avatar lifecycle, leaderboard writes, admin moderation — with **deny-by-default security rules** eliminating direct client writes on every critical path.
- Enforced OTP security with SHA-256 hashing, 10-min TTL, 5-attempt lockout, and **per-email/IP rate limiting**; shipped a **GitHub Actions CI/CD pipeline** gating every release on **101 test files / 414 test cases** with 63% branch-coverage enforcement.

NumDuel — Real-Time Multiplayer Guessing Game

Apr 2025 | [GitHub](#) | [Live](#)

Node.js · Socket.IO · Express · PostgreSQL · Redis · Docker · GitHub Actions · Jest · Playwright

- Built an event-driven multiplayer game with **20+ custom WebSocket events** covering the full game lifecycle; designed a pluggable storage abstraction (MemoryStore/RedisStore) for **horizontal scalability** with rotating reconnect secrets and a 120-second server-side grace period for resilient sessions.
- Designed a **dual-layer caching and persistence** architecture — **Redis** for TTL-backed live session state and **PostgreSQL** with indexed leaderboard queries for durable profiles and stats; Dockerized with Compose (Node 20, Redis 7, PostgreSQL 16) and gated CI/CD deploys on **40 passing Jest and Playwright tests**.

EXPERIENCE

LearnLogicfy Technologies LLP

June 2025 – July 2025

Web Development Intern

Coimbatore, India

- Built 15+ responsive, cross-browser-compatible UI components using HTML5, CSS3, JavaScript, and Bootstrap; created reusable templates that improved delivery consistency and reduced per-feature development time across client projects.

COMPETITIVE PROGRAMMING

- **LeetCode:** Max Rating **1979** (Top 3.68%) | 400+ Problems | **Knight Badge** | Best Contest Rank: **114**
- **Codeforces:** Max Rating **1873 (Expert)** | 150+ Problems | Best Contest Rank: **514** (Round 1066)
- **CodeChef:** Max Rating **2014 (5-Star)** | 250+ Problems | Best Rank: **20** | Global Rank: **1454**
- **GeeksforGeeks:** Coding Score **703** | 200+ Problems Solved

ACHIEVEMENTS & CERTIFICATIONS

- **3rd Place** — REGENHACK (36-hour *solo* hackathon) at SRM Chennai Among 500+ Participants | **Top 50** — Intercollegiate Hackathon
- **Certifications:** Advanced DSA (Coursera) | Python Programming (NPTEL) | Advanced System Design (ByteByteGo)
